

Stitcher of louvred

CMA 2000 - cm/E

Description

- Machine extremely solid - minimum footprint - rapid development and easy. It work two amounts simultaneously. Adjustable distance between the beginning and end of work. Control Panel in low voltage with switch "push" for the phase of réglage Interrupteur security to Palm for safety stop - switch (automatic cycle) - the end of the race to automatic stop for end of work.

Stitcher of louvred

Technical characteristics

Tilt	20°-45°
Not standard of the rack of Progress	36 mm
Mortice Depth	0-20 mm
Max. Length The mortise	0-120 mm
Max dimension amounts in wood	100x110 mm
Min. dimension amounts in wood	20x40 mm
Speed of execution of the mortaises	12+12=24
Max. length amounts in wood	2800 mm
Engine	3 CV
Mandrel speed	9600 rpm
Weight	310 kg
Dimension of Footprint	1150x700x990mm
